

Campaign to Ban Human Cloning

Unformatted Text of Postcard

Please support the Brownback/Landrieu Human Cloning Prohibition Act, S. 245, and oppose legislation allowing any human cloning. Cloning should not be used to produce children as “copies” of other people, or to create human embryos so they can be destroyed as raw material for experimentation.

Cloning reduces human procreation to a manufacturing process in a laboratory. It demeans parenthood, treats human life as disposable, and exploits women for their eggs. Congress should only support research that respects human life and dignity.

As your constituent, I would appreciate a written response telling me how you will vote on S. 245.
